User Manual

Welcome to the Hot Air Balloon Racing Game! This guide will help you get started and understand how to navigate the gameplay for the best experience.

Getting Started

1. **Balloon Selection**
   - When the game begins, you will see four parked hot air balloons on the screen.
   - Two players can participate, each choosing one balloon.
   - Player 1's selection will be highlighted in red, while Player 2's selection will be highlighted in blue.
2. **Starting the Game**
   - After selecting your balloons, a "Start Game" button will appear.
   - Click the button to proceed to the main game scenario.

Main Game Scenario

The game takes place on a dynamic racing track featuring:

- **A Path**: The racing route where the action unfolds.
- **Power-Ups**: Collect these to gain vouchers and avoid penalties.
- **Obstacles**: Watch out for spike balls! Colliding with them will result in penalties.

You will compete against an automated balloon (bot) while keeping track of your progress.

Game Interface

- **Central Panel**: Displays essential data, including:
  - Your current time on the track.
  - The number of power-ups collected.
  - Your remaining vouchers.

Gameplay Tips

- **Using Power-Ups**: Power-ups grant you vouchers to bypass penalties caused by collisions with obstacles. Use them wisely!
- **Avoiding Obstacles**: Steering clear of spike balls is crucial to maintain your lead.

Winning the Game

To win, you must finish the race in a shorter time than the bot. Stay focused, use your power-ups strategically, and navigate the course efficiently.

Good luck, and may the best balloonist win!
